Infographic: Online Travel Booking Trends and Web Analytics [1]

TrainingAid's infographic, "Online Travel Booking Trends: Why Analytics Matters," explores how today's travelers find and book travel online. More and more travelers around the world are using the Internet as a main source of travel information, inspiration, and planning. In many markets, this trend is also increasingly shifting from desktop to mobile and tablet devices.

In addition, online travel booking patterns follow diverse and complex paths as many different marketing channels - social media, email, peer
reviews, online advertising, search, etc. - influence customer's journey towards purchase. Faced with these online travel booking trends and the unique challenges they present, tourism businesses need smart, data-driven approaches to their digital marketing and sales strategy. And that's where web analytics comes in.

Learn more about today's online travel booking trends and how you can use analytics to make the most of digital marketing data for your tourism business [10]. You can click on the image below to see the full-sized infographic. For a more in-depth look, check out our blog post on analytics and online booking trends [11].
Online Travel Booking Trends

US$126.6bn

US$91bn

2013

2015

How do travelers get to travel decision-making?

There are many different paths travelers take before making the decision to book a trip with you. To make sure that as many of those paths as possible lead to bookings, you need to pay attention to the whole journey, not just where they end up when they book.

Focus not only on what they do right before booking, but also on the journey they take to get there.
